Bird's beaks

and feet

give clues to where birds live and what they like to eat.

A sharp beak

and sharp claws means the bird eats meat.

A flat, wide beak

means the bird eats weed and tiny insects that live in the water.

These birds have webbed feet.

A small pointed

beak means the bird is really good at catching insects. These birds have short toes for

sitting on branches and wires.

Draw a line to match the bird to the description and then to its habitat.

<p>Buzzard</p> 	<p>This bird has a small pointed beak, short wings and feet that make it easy to land on trees. This bird eats insects and spiders in the summer and berries and seeds in the winter. It lives in the woods but can also be seen in the garden.</p>	 <p>Sea (Image: gov.im)</p>
<p>Great Tit</p> 	<p>This bird has webbed feet, a beak with a tube on top and pointed wings. This bird eats fish and squid. Its pointed wings make it easy to soar and glide as this bird lives out at sea. It lands on the cliffs in spring to make its nest.</p>	 <p>Hills and Mountains (Image: Credit visitisleofman.com)</p>
<p>Fulmar</p> 	<p>This bird has a sharp beak, sharp long claws and wide wings. This bird eats meat. It lives in the mountains.</p>	 <p>Woods (Image: Credit Manx Wildlife Trust)</p>

Fill in the words (Flowers and Snail) and colour the pictures to finish the two food chains.
