Education Programme Short-eared Owl

Manx BirdLife Nature. For generations

Scientific name: Manx name: Length: Wingspan: Weight: Asio flammeus Hullad ghiare-chleayshagh, Hullad ny gurreeyn 34cm - 42cm from tip of beak to tip of tail 90cm - 105cm 260g - 350g

Short-eared Owls are often seen hunting during the day. There are many more Short-eared Owls in the UK and Isle of Man during the winter as they migrate from colder countries such as Russia and Iceland. They mostly feed on small mammals, especially voles.

Fun fact: Short-eared Owls nest on the floor!
